Midterm Exam 1

General instructions

- You are allowed to use any IDE (CodeLobster, VS Code, Eclipse, IntelliJ, XCode, etc.)
- Don't change nothing at **index.html** file**.**
- Use the given files to complete this lab.
- You must add my GitHub username (**eduval**) as a collaborator in your repository.
- Apply **git add, git commit, git checkout, git branch, git push** commands correctly to complete this Lab.
- In branches, rename **yourlastname** whit your last name. For example: **feat_mt1_valencia**
- **feat_mt1_yourlastname** must include all your tasks for **mt1_index.html page.**
- After completing a by feature merge it to development branch, to master branch and push it.

Specific Instructions

1. Create a new folder called **assessment2**.

2. Move inside **assessment2** and initialize it as a new local repository with **git init** command.

3. Create four branches as following:

   a) master

   b) development

   c) feat_mt1_yourlastname

4. Switch to branch **feat_mt1_yourlastname** and complete the following tasks:

   1. Open the files **mt1_index.html**. Add your name and the date to the files. Follow these steps to complete the tasks:

   2. In **mt1_index.html**:
      a. Set the **title** to "David Tree Care Home".
      b. Insert **aside** and **article** elements within the document **body**, after the **header** element.
      c. In the **aside** element, add an **image** for mt1_comments.png and set **alternate** text as "Comments".
      d. Copy the text of the three reviews, including the reviewer names, from mt1_data.txt and paste it into the **aside** element. Enclose each review in a **blockquote** element, thenwithin each of the three **blockquote** elements:
         i. Mark the review as a **paragraph**.
         ii. Mark the reviewer name as a **cite** element.
         iii. Change the "---" to the em dash character (—) by using character reference **—**
      e. Insert a **header** element within the **article** element containing the **image** mt1_photo1.jpg with the **alternate** text "David Tree Care".

f. Copy the second section of text from mt1_data.txt containing the company's description and contact information, and paste it directly below the **article header**. Then, mark up the content of the page article as follows:

    i. Mark up the first two paragraphs using **p** elements.

    ii. Use an **address** element for contact information, **strong** for "David Tree Care" and **email and phone links** (by using **mailto** and **tel** for **a** tag) for email and telephone number. Remember to add a **line break** element at the end of the first four lines to ensure that each part of the address is displayed on a separate line.

g. Save and view the **mt1_index.html** file in the browser to verify its layout and content.

5. Add, commit, merge, and push it.
